

Front Access Custom Commercial Boxes

Front Access Commercial Boxes provide the same efficiency and security as the Rear Access boxes, except these models were designed with a door *inside* a door- allowing for mail delivery AND recipient access to both be on the FRONT of the box.

This option broadens location possibilities and can simplify access to your mail.

Front Access Collection Boxes are made of 14 gauge aluminum and come standard with a high-security Medeco deadbolt, two keys and is prepped for the USPS universal lock for pick-ups and deliveries. Commercial Boxes are also available in Stainless Steel.

We offer posts for this product in both surface mount and in-ground models. **Posts sold separately.**

*** Collection boxes are NOT for residential use and can not be returned or exchanged. Requires local U.S.P.S. approval prior to installation.**
